

Megatech International

Megatech's **Fusion CA Adhesives** are limited production bonding agents, strictly monitored to maintain the highest standards in their chemical consistency and quality control. This tight control assures dealers of the freshest stock with the longest possible shelf life. Fusion CA adhesives undergo a meticulous molecular filtering process to preserve the highest molecular matrix integrity, and Megatech guarantees customer satisfaction. Instant CA (#MTC 1121 and #MTC 1122), Gap Filling CA (#MTC 1124 and #MTC 1125) and Super Thick CA (#MTC 1127 and #MTC 1128) are each available in unbreakable one-ounce and two-ounce bottles. Fusion Quantum Xcelerator is also available, and will not crystallize or turn white. One-part Fusion Poxy in a two-ounce bottle complements the line.

Circle Reader Service Card #6.
